

# INTENTION TO DIG

Please read this document carefully as it outlines important information regarding the use of excavation, staking objects and earth-boring during a sign installation process.

Signs By Knight will take as much care as possible and reasonably practical in excavation, staking objects and earth-boring required as part of a signage installation.

However, no responsibility will be taken by Signs by Knight proprietors, employees, agents or sub contractors for any damage caused to underground services, however it is caused.

It is the responsibility for the below stated Client/Customer to make every effort to have these services checked and located. Alternately, notice must be given to Signs By Knight at least seven (7) working days before works are to be commenced, so that correct procedures can be auctioned to have all services checked, this will incur a nominal fee. These services include Electrical and Data cables, Mains Water, Gas and Telecom services.

It is also the responsibility of the Client/Customer to indicate location of secondary underground utilities such as watering systems before commencement of works. Signs by Knight will not be responsible for repair for damage caused to these utilities.

I.....  
OF (company name).....

Take full responsibility for the location of underground services at  
.....
