

MAGNETIC SIGN CARE

Clean both the back of magnetic sheet and surface to be applied to before application.

Use a damp chamois for cleaning both sides of magnetic sheet.

Never apply to wet metal surface.

Remove at night or when not required on vehicle and re-clean before re-applying.

If it has been raining remove signs and dry behind as soon as possible.

Remove when washing vehicle and only re apply to completely dry surface.

If left on a vehicle for extended periods of time can cause damage to paintwork.

If travelling at speeds in excess of 100km/h remove signs from vehicle as they may fly off.

Store magnetic signs flat or on another metal surface when not in use.

Please contact Signs By Knight for any further information required.
